Fixed scope and customer priorities

Excel-only prototype / G60 / prioritised from customer feedback

FIXED AGENT SCOPE

- Read G60 feedback; retain each original ID, source, country, engine type and topic label.
- Group named features; count distinct feedback IDs with Defect, Difficult to Use or Wants labels.
- Filter by country and engine type; show the underlying comments for every ranked feature.
- Produce a product-manager brief with evidence, open questions and a human-review flag for safety-related reports.

SCOPE CATEGORIES / RANKED BY CUSTOMER SIGNALS

RANK	PRODUCT AREA	LEVEL	IDs	MOST CITED FEATURES
01	**Driving and powertrain**	HIGHEST	**192**	Drivetrain (66), Automatic engine start-stop function (MSA) (34)
02	**Vehicle access and cargo**	HIGHEST	**190**	non-contact trunk lid opening (41), Vehicle, lock / unlock (30)
03	**Connectivity and infotainment**	HIGHEST	**186**	Apple CarPlay (36), ConnectedDrive and Infotainment, overall technology (29)
04	**Digital cockpit and controls**	HIGH	**157**	Touch screen, operation (34), Operating concept, operating system (32)
05	**Electric range and charging**	HIGH	**147**	Electric Range (61), Public charging / external providers (40)
06	**Seats and climate**	MEDIUM	**131**	Seats (53), Vehicle, climatization (22)
07	**Driver assistance and parking**	MEDIUM	**99**	Parking Assistant (20), (Active) cruise control (19)
08	**Design and materials**	LOWER	**55**	Exterior (18), Interior design (15)

HOW TO READ THIS RANKING

The sheet has 5,005 tagged rows representing 4,000 feedback IDs. 1,903 IDs have at least one actionable tag; the selected named features cover 1,045 of them. A feedback ID can appear in more than one category, so category counts do not add up. Levels use distinct IDs: Highest 170+, High 140-169, Medium 90-139, Lower below 90.

Escalation: braking, steering, driver-assistance and parking-brake defect reports require human review regardless of their volume rank.

Included features

Counts are distinct actionable feedback IDs per original workbook topic label

Driving and powertrain	**192**
Drivetrain	66
Automatic engine start-stop function (MSA)	34
My Modes / driving experience	32
Braking	30
Wheels / tires	17
Steering	16
Handling / Riding	12
Vehicle access and cargo	**190**
non-contact trunk lid opening	41
Vehicle, lock / unlock	30
Door, open / close	29
Luggage compartment	22
Comfort Access	21
Vehicle key	18
Trunk lid, open / close	17
Digital Key	15
Connectivity and infotainment	**186**
Apple CarPlay	36
ConnectedDrive and Infotainment, overall technology	29
Mobile device, wireless charging	26
Navigation	26
Audio mode, sound	25
My BMW App / MINI App	18
Remote Software Upgrade/RSU	16
Manage / pair mobile device (Bluetooth)	11
Personal eSIM	9
Digital cockpit and controls	**157**
Touch screen, operation	34
Operating concept, operating system	32
Instrument cluster	32
Driver profile	22
Head-Up Display	20
Instrument panel	18
Electric range and charging	**147**
Electric Range	61
Public charging / external providers	40
Charge high-voltage battery	27
Opening/closing charging socket cover	16
High voltage battery	12
Seats and climate	**131**
Seats	53
Vehicle, climatization	22
Air conditioning, setting	20
Blower function	17
Seating, ventilate / heat	13
Seat massage	12
Driver assistance and parking	**99**
Parking Assistant	20
(Active) cruise control	19
Highway assistant	15
Driver assistance, automated driving, overall technology	11
Lane departure warning	10
Rear view camera	9
Park Distance Control (PDC)	9
Parking brake	8
Design and materials	**55**
Exterior	18
Interior design	15
Exterior design	13
Upholstery / interior trim	9

Boundary: this phase uses only G60 Excel feedback. Likes remain searchable but do not raise urgency. Unclassified and unselected long-tail topics remain in a review queue. The file has no production rules, cost data or verified feasibility evidence.

Method note: these are feedback records, not unique customers. Most records are US-based, so this is directional customer feedback rather than a market-wide demand estimate.
